EXPERIENCE

Associate Principal Engineer | Feb 2018 - Present

Nagarro, Gurugram, India

While working for a leading South African banking client. Built a web application for business banking clients from scratch. The application allows small business customers to open current accounts from a place of their convenience with a seamless digital experience.

After that moved to project for a leading European beauty and cosmetic products e-commerce client. Where I lead the front end development team which worked on development of an e-commerce platform that supports multiple business units from the same codebase without compromising with the unique features and behavior offered by each unit.

Also contributed towards organizational activities at Nagarro by training freshers, juniors, mid level developers, designing course materials and assignments for the Learning & Development team and providing mentorship to new joiners.

Senior Technical Developer | Aug 2017 - Jan 2018

Agile Cockpit, Gurugram, India

As part of the web development team, I worked closely with the product owners to develop the in house agile project management tool, which provides features like backlog management, kanban board, sprint reporting and other elements relevant to agile development teams and product owners.

Test Engineer | July 2014 - July 2017

Infosys, Mysore, India

As part of the Quality Assurance CEO for a leading European bank i was a part of the team responsible for development and maintenance of a Quality Dashboard which was built to for reporting of the status of various technical banking systems like payments, transactions and customer.

After that i moved to a project with one of the leading aircraft manufactures. Where we built a web based tool for creating prototype layouts of an aircraft using a web based interface which can later be exported and works as input for the design team to work with the design. During my time there i lead a team of 4 developers and along with development was also responsible for handling requirements gathering, refinement and documentation.

"
With 11 years of industry experience I'm a dedicated and skilled software engineer with a passion for developing innovative solutions. Proficient in Angular, ReactJS & other Web development technologies.
